

Dear President,

April 21,2007

1. We are confident that you are fully aware that organizations and individuals engaged in CUDP activities of one type or another in the country or outside have been, and still are, solidly behind your leadership.
2. In the event there is any doubt in this respect, it is the link group between KIL and Kality CUDP leadership that is to be held accountable. Please rest assured that there is undivided loyalty among CUDP members, supporters and organizations in Ethiopia and abroad to you personally and the other members on the CUDP leadership
3. As you are aware there has been a problem within the ranks of KIL in the US. The cause of it is weak and indecisive leadership of one group and undue aggressiveness and lack of human relations skills with the other. It seems the issue between the two groups has somehow attained an irreconcilable position since some time now. We seriously doubt whether uniting the two groups to form a cohesively functioning KIL that could provide the party a dynamic leadership is possible at this stage. The problem however is waning currently and may soon disappear because the group with the majority of KIL members seems to be controlling the situation. An injection from your could help immensely to bring about stability in the KIL leadership. It is to make a call on both groups in a note bearing your signature to make amends in the interest of the cause.
4. Needless to say that KIL's size of membership has to increase because making amends would necessarily result in the loss of some, and also because of increasing challenges our party is facing. To do this the group with the majority of KIL members has made a proposal for your approval. Your early response is crucial.

Thank You
YT
