Is Thank you enough for sheikh Al Amoudi?

Where do you start when you are saying thank you for a person who carries a nation on his shoulders? "God be with you," would be a good start. If I may, I would like to say thank you for being one of Ethiopia's son and unwavering determination that you have for the countries development and the people at large. When most of Ethiopian millioners shy away from investing in the country for some reason or another, **One good hearted man stood among them and tested the waters and started the ball rolling on the countries infrastructural development and for the betterment of our people at large.**

The development endeavor that you have taken for the last fourteen years throughout the nation is unprecedented to say the least. All of this with out any reservation to what may happen to your investment with a new untested fragile government and uncertain market within the nation. When the young and vibrant sheikh Mohammed Hussein Al Amoudi when to back home to Ethiopia Thirteen or Fourteen years ago to see what he can do for his country, He immediately knew that he would have to do his part to participate in building the nations infrastructure no matter what kind of obstacles may become in his way. **Armed with a love for his country and the people at large he focused on how to build a strong economy and highly skilled work force for our nation. Fortunately he wasn't disappointed by the reception he got from the government or the people at large. In fact the government has asked him what they can do to help accelerate the process to help him start as soon as he wishes in his endeavors.**

The sheikh immediately incorporated his organization and started working on project after project every year since his arrival. **Thank God, year after year we are witnessing his contribution on development and employing hundreds of thousands of skilled hard working people throughout the nation. As the largest employer in the country, the organization is to be commended for what they have provided for the peoples wellbeing and for the nations infrastructural development. For example the gold mining, Cement factory,**

textile factory, housing developments and the 60 million dollar venture company that be exploring and developing coal, which will offer other industries an alternative for power consumption. These are some of the benefits of this man and his organization under his leadership of sheikh Al Amoudi for our country and the people of Ethiopia as a whole.

On a personal level sheikh Al Amoudi is a very kind and honest man who has a big heart and compassion for all humankind. I have heard people say so many things about his kindness and compassion for some time. I personally have seen some of the kindness and compassion first hand that this man has for Ethiopians and the love of his country. I can testify for some of his unreserved kindness and compassion that he shows for all Ethiopians is beyond any ones capacity. For the last five or six years the sheikh has been personally involved in helping our people who can't afford medical treatment within the country. As well as sending them abroad for a better treatment to give them a second chance on life. We are thankful that he is one of us and he is here to stay. Surly we all heard what the sheikh has done when he visited Kamilat Mehdi at the hospital. As kind and concerned as he is for all Ethiopians wellbeing he asked the hospital administration if he could offer his help for her and send her abroad for a needed treatment at his expense. What a wonderful human being he is and **this is the kind of concern, kindness and compassion of our ancestors that he inherited and is passing on to the next generation.** Thank you sheikh Al Amoudi keep doing what your heart tells you and may God be with you and your family.

Sincerely yours

Atakelti kebede
